

CERIUM OXIDE BASED GLASS POLISHING COMPOUND

Typical Physical Properties

- **Appearance** white powder
- **pH**5.8 – 7.5
- **Particle Size(coulter)**
 - D₅₀ 1.1 – 1.8 μm
 - D₀..... 15.0 μm
- **Composition:**
 - TREO.....80% min
 - CeO₂ 75 – 85 %
- **Suspension Treated**....Fine flock, soft settle

Applications

- ✓ Ophthalmic applications with speeds up to 1500 RPMs
- ✓ Precision optics applications where a high stock removal is required
- ✓ For use in single bowl and central slurry systems
- ✓ Can be used with polyurethane and pitch

Output: Coulter Multisizer

- **Packaging** 20 kg carton; 640 kg/pallet
- **Cautions** Refer to Material Safety Data Sheet
