

## ALUMINA BASED POLISHING COMPOUND FOR SAPPHIRE SUBSTRATES

### Typical Physical Properties

- **Appearance** ..... White slurry
- **pH @ 10%** ..... 10.5 – 12.0
- **Particle Size (Light Scattering)**  
D50 ..... 0.17 – 0.21µm
- **Composition**  
Wt-% Solids Content ..... 20%
- **Storage & Handling**  
Do Not Freeze

### Applications

- ✓ Fully formulated aluminum oxide based polishing slurry product for use on sapphire substrates.
- ✓ The combination of high purity alumina and additives are optimized for performance and excellent dispersion providing fast removal rate and excellent surface quality characteristics.

- **Packaging** ..... 5 Gal/20 Kgs/pail; 480 Kgs/pallet

- **Cautions**..... Refer to Material Safety Data Sheet
